OBJECTIVES

B.Tech Computer Engineering graduate skilled in full-stack Python web development, bot development, automation scripts, and Android application development. Experienced in building and deploying software solutions, with a strong interest in creating efficient, scalable, and user-focused applications.

PROJECTS

Telegram Broadcasting Platform ([bot.dhyey.space](https://t.me/bot.dhyey.space))

- Developed a web-based platform for managing Telegram groups through the Telegram Bot API.
- Implemented broadcasting capabilities, enabling administrators to send messages to multiple users from a centralized dashboard.
- Built tools for complete group management, user interaction, and message delivery.
- Designed and deployed a scalable backend with secure API integrations for real-time operations.

Image Hosting Platform (image.dhyey.space)

- Developed a cloud-based image hosting platform for uploading, storing, and sharing images through direct links.
- Implemented secure file handling, storage management, and image delivery features.
- Built REST APIs for image upload and retrieval, ensuring efficient performance and accessibility.
- Deployed and maintained the platform on a production environment.

EDUCATION

B.Tech Computer Engineering <u>Chhotubhai Gopalbhai Patel Institute of Technology (CGPIT)</u> Uka Tarsadia University	2022 - 2026
H.S.C Sarwa Mangal School, Vadodara	2020 - 2022
S.S.C Bright School, Vadodara	2019-2020

ADDITIONAL INFORMATION

Technical Skills:

- 1.Full-Stack Python Web Development (FastAPI, Flask, Django, MongoDB)
- 2.Bot Development & Integrations (Telegram Bots, Web Applications, API Integrations)
- 3.Automation Engineering (Content Distribution, Workflow Automation, Process Automation)

- **Languages:** German, English, Hindi, Gujarati (Mother Tongue)
- **Certifications:** Mastering the Big Data : with MongoDB
